

6 Month Data Scientist Internship

(PORDA0703)

PLEASE READ CAREFULLY BEFORE CONTINUING.

ESPA or European Student Placement Agency is a recruitment agency whose goal is to find high quality internships for European students and recent graduates in the UK. We work closely with our host companies to ensure the positions provide the candidates with a great experience, both professional and personal.

REQUIREMENTS: ESPA vacancies are open to all EU passport holders able to travel to the UK for an educational work placement, without the need for visa documents. You have to still be a student or have graduated in the last 12 months. Any student who is unsure of their visa situation should check with their university before applying.

BENEFITS: All ESPA's services are **free** for students and alumni. The benefits are:

- 1) Paid Accommodation.
- 2) Paid Utility Bills (electricity, gas, water and council tax) + Internet Access
- 3) Commuter travel to work (accommodation will be found within an acceptable commuting distance from the workplace, if that requires more than a sensible walk then a bus/train ticket will be provided).

This will be sourced and managed on your behalf by ESPA. **These benefits have an approximate value of 700€-1000€ per month (depending on location).**

There is no salary over and above the benefits offered, unless specifically stated.

The Host Company

Family business started in Spain in 2003 with a property website, in 2009 the business moved to the UK and their website became leading portal for international buyers of Spanish Property with revenue of €1.5M. The chosen candidate will work with a small team of 20 software developers and customer support staff working in 5 different countries. Communication and actions happen quickly within the team, with everyone empowered and expected to take the lead. In the company own words "We expect to make mistakes, and we expect to put them right-as a team". The company is growing rapidly and this is an exciting phase of their history, in 2016 they will expand to serve other property markets –and maybe even disrupt them a little bit.

Role

As a Data Scientist the intern will help the company make sense of their high value of data they have accumulated over the past 13 years. The intern should be able to help the company understand where they have enough data to draw significant conclusions – and where they don't. Find interesting data and interpret them, as well as help design algorithms to gain deeper insights and conclusions will be some of the challenges. After getting familiar with the data, the intern should work autonomously to solve real problems and publish real insights. The intern should be fascinated by data and unlocking its secrets and thrive on figuring out stuff autonomously rather than being told the answers. Depending on the intern performance a job may be offered. The interns commercial, people and technical skills will be raised.

Duration

6 months

Location

Bath. A world-heritage city in the South West of England which hosts two great universities. With a truly international feel it has wonderful cultural experiences and is just 1.5 hour train journey from London and a 15 minute train journey from the vibrant city of Bristol.

Languages

English should be at least C1 (professional proficiency). French or Spanish would be an advantage.

Start date

April 2016.

Tasks

- Distinguish between all data what is relevant and what is not to draw significant conclusions
- Find interesting data and interpret it
- Design algorithms to gain deeper insights and conclusions
- Solve real problems and publish real insights once you are familiar with the data

Personal Skills

Essential:

- Maths background.
- Strong analytical skills.
- Fascinated by data and unlocking secrets.
- Autonomy/Curiosity.

Desirable:

- Knowledge of French or Spanish would be an advantage

How to apply
