

6 Month Software Developer Internship

ALFQA0410

PLEASE READ CAREFULLY BEFORE CONTINUING.

ESPA or European Student Placement Agency is a recruitment agency whose goal is to find high quality internships for European students and recent graduates in the UK. We work closely with our host companies to ensure the positions provide the candidates with a great experience, both professional and personal.

REQUIREMENTS: ESPA vacancies are open to all EU passport holders able to travel to the UK for an educational work placement, without the need for visa documents. You have to still be a student or have graduated in the last 12 months. Any student who is unsure of their visa situation should check with their university before applying.

BENEFITS: All ESPA's services are **free** for students and alumni. The benefits are:

- 1) Paid Accommodation.
- 2) Paid Utility Bills (electricity, gas, water and council tax) + Internet Access
- 3) Commuter travel to work (accommodation will be found within an acceptable commuting distance from the workplace, if that requires more than a sensible walk then a bus/train ticket will be provided).

This will be sourced and managed on your behalf by ESPA. **These benefits have an approximate value of 700€-1000€ per month (depending on location).**

There is no salary over and above the benefits offered, unless specifically stated.

The Host Company

This company is leading the convergence of Electronic Content Management (ECM) and Business Process Management (BPM), helping create efficient connected processes which present content in context. More than 1,800 companies in 195 countries rely on this company, including leaders in financial services, healthcare, and the public sector. Since 2010, they have grown ~25% year over year on average, and have helped an increasing number of companies deal with challenges of the modern work place.

Role

The host company is currently looking for a candidate to join their **Quality Assurance team** as part of their main purpose, developing Electronic Content Management (ECM) and Business Process Management (BPM) tools. They offer a friendly, dynamic and inclusive working environment with like-minded, talented and passionate individuals. This is an exciting time for the company and presents candidates with an opportunity to join a rapidly expanding organisation involved in ground-breaking technology that is already changing the industry.

The ideal candidate will be a **proactive, self-motivated and quick to learn** student or recent graduate who is looking for a challenging and rewarding internship in which they can put their knowledge into practice, whilst receiving training and support from the host company.

Location

London is the capital and most populous city of England. London is a world cultural capital with a population of over 8 million.

Languages

English should be B2/C1 minimum

Duration

6 months.

Start date

As soon as possible

Tasks

- Using project management tools, you will be trained and supported to review, evaluate and turn high-level requirements into detailed test cases
- Ensure issues are identified, tracked, reported on and resolved in a timely manner, assisting in the investigation and resolution where time permits.
- Ensure testing is carried out in a timely, repeatable and effective fashion. Investigate and resolve causes of instability in the automated test execution.
- Work with development to design and incorporate entry points and instrumentation in the code for testing frameworks to use.
- Determine when components meet acceptable quality criteria and standards and give the go-ahead for release to production.
- Coding up test scripts for the Automation framework.

Personal Skills

- A genuine interest in Quality Assurance
- A good understanding of test methodologies and processes – for web applications.
- Understanding of creating test scenarios/scripts.
- A working knowledge of OS X operating systems.

Essential Skills:

- Good communication skills and great team player.
- Time management skills in order to accomplish deadlines.
- Problem solving skills.
- Some knowledge of Quality Assurance processes

Desirable Skills:

- An appreciation of project management process.
- Knowledge or usage of testing and development of any Web application.
- Awareness of Test Automation development and maintenance for Web applications.
- Knowledge of coding languages, including JavaScript or Python.
- Some knowledge or awareness of any **automated testing tool**, such as Jenkins.
- An understanding of Continuous Integration or Continuous Delivery testing with any applicable tools
